Summary

Full-Stack Developer specializing in React, React Native, TypeScript and Node.js, with experience building complete web and mobile applications from conception to deployment. Skilled in RESTful APIs, authentication (JWT/OAuth), SQL and NoSQL databases, AI integrations, responsive UI development, Git workflows and Agile practices. Experience delivering freelance and personal projects, with strong focus on clean architecture, user experience and scalable solutions. Seeking a Junior Software Engineer, Full-Stack Developer opportunity or Full-Stack Developer Internship.

Technical Skills

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, React Native, Tailwind CSS, Vite, Responsive Design, Context API, Hooks

Backend: Node.js, Express, RESTful APIs, JWT, OAuth

Databases: MongoDB, PostgreSQL, Supabase, Firebase

Tools: Git, GitHub, VS Code, Figma, Postman

Practices: Agile, Scrum, Clean Architecture

AI & Integrations: Groq, AI APIs, Prompt Engineering, Mercado Pago

Professional Experience

Freelance Full-Stack Developer

2025 – Present

Self-Employed

Remote

- Designed and developed complete web applications for personal and freelance projects.
- Built responsive interfaces using React, React Native, TypeScript and Tailwind CSS.
- Developed RESTful APIs with Node.js and Express.
- Implemented JWT authentication, Google OAuth and payment integrations.
- Worked with MongoDB, PostgreSQL, Supabase and Firebase.
- Integrated Artificial Intelligence features using the Groq API.
- Managed projects from planning and design through deployment.
- Applied Git workflows and Agile development practices.

Featured Projects

Zatura | *Vite, Node.js, MongoDB, Groq*

2026

- Productivity SaaS featuring Kanban boards, task management, goals, calendar and AI-powered assistance.
- Designed a complete full-stack architecture using Node.js, MongoDB and the Groq API.

Confere Aê | *Vite, Supabase, Tailwind CSS*

2026

- Data-driven platform for comparing the financial performance of Brazilian football clubs.
- Implemented secure authentication, payment processing and cloud database architecture.

O Verbo | *TypeScript, Tailwind CSS, Groq*

2026

- AI-powered Bible study platform focused on contextual explanations and interactive learning.
- Built an intelligent assistant using the Groq API to improve scripture understanding.

Ministério Kids | *TypeScript, Tailwind CSS, Groq*

2026

- Educational platform that helps teachers prepare personalized lessons for children's ministry.
- Implemented AI-assisted content generation tailored to user-provided lesson topics.

Other Projects

Mistura Boa | *React, TypeScript, Node.js, MongoDB*

2025

- Recipe sharing platform with authentication, MongoDB and gamification.

ViaJour | *React, TypeScript, Node.js, MongoDB*

2025

- Travel planning platform with itinerary management.

Tá na Bíblia? | *TypeScript, Tailwind CSS*

2026

- Responsive Bible quiz built with TypeScript.

Education

Professional Software Development Training	2024 – Present
<i>Self-directed Software Engineering Program</i>	<i>Online</i>
- Completed hundreds of hours of specialized training through Udemy, YouTube and official documentation. - Focused on Full-Stack Development, React, React Native, Node.js, TypeScript, databases and software architecture. - Applied every technology learned by building complete production-level applications.	
High School Diploma	2022
<i>Criativa</i>	<i>Cotia, São Paulo</i>

Additional Information

- Author of two published children’s books, with experience in communication, creativity, and storytelling.
- Advanced English.
- I have been serving for months as a teacher for children in the Children’s Ministry.
